

What animal would *you* bring back from extinction?

In the book *Ash, Ruby and Jack* live at MAC (Mammoth Arctic Conservation Trust) headquarters in Greenland, where mammoths have been cloned and brought back from extinction to help with the battle against global warming.

If you could bring an **extinct animal back**, what would it be?

- Saber Toothed Big Cats - *Smilodons*
- Dinosaurs
- Dodos
- Tasmanian tiger - *Thylacine*
- Something else...

Whatever it is, I'm sure it's **roar-some**.

MAMMOTH RIDER
